**Comment [Editor1]:** Please enter the date of submission here.

Dear Editor,

**Comment [Editor2]:** Please enter the name of the editor-in-chief of your target journal here.

Please find enclosed our manuscript titled "[REDACTED]" as an Original Article for publication in [REDACTED].

We synthesized a series of [REDACTED] and [REDACTED] and studied their role in ameliorating inflammation. These [REDACTED] were characterized using NMR and mass spectrometry, and X-ray crystallography. The targeted compounds were further screened for their anti-inflammatory activity by [REDACTED]. Among the newly synthesized derivatives, [REDACTED] and [REDACTED] reduced inflammation significantly [REDACTED], thus showing extremely promising anti-inflammatory activity.

We believe these findings are of particular interest to the readers of [REDACTED] since they may not only be relevant for a wide variety of clinical conditions [REDACTED], but may also give important clues on [REDACTED] at an early stage.

This manuscript has not been published and is not under consideration for publication elsewhere. All authors have read the manuscript and have approved this submission. The authors report no conflicts of interest. The manuscript has been carefully reviewed by an experienced editor whose first language is English and who specializes in editing papers written by scientists whose native language is not English.

We appreciate your review of this manuscript for publication in [REDACTED].

Sincerely,

Author Name
